

Junction Box **CEM4-C**

Technical specifications

PVS10420200710

The CEM4-C junction box is able to communicate up to 4 load cells: it synchronizes measurements and ensures correct and accurate weight values. The CEM4-C product collects the signals of the individual cells and translates them into a single signal. Our junction boxes are equipped with a quick connector for connecting our Tester 1008, which allows immediate control of the signals of the individual cells and system diagnostics.

Temperature range: -10 ÷ +50 °C (max 85% humidity without condensation)

Storage temperature: -20 ÷ +70 °C

Drilling template: 188 x 118 mm (L x H)

Dimensions: 200 x 150 x 75 mm (L x H x D)
